Professional Summary

MERN Stack Developer skilled in JavaScript, TypeScript, React.js, Node.js, Express.js, and MongoDB, building responsive interfaces, REST APIs, and full-stack applications. Experienced integrating AI/LLM features, working with AWS cloud infrastructure, and following Git-based, Agile, test-driven development practices.

Certifications

- AWS Certified Solutions Architect – Associate
- AWS Certified Cloud Practitioner
- IBM AI Engineering Professional Certificate
- Blockchain Basics – Coursera

Achievements

- Solved 500+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
- Winner – GDSC Coding Contest 2024 (Rank 1 among 120+ participants).
- Runner-up – University Hackathon for building an innovative software solution.
- Strong foundation in full-stack development, cloud infrastructure, and software engineering principles.

Experience

Software Engineer Intern

january 2026 – september 2026

Adore India

- Built responsive, reusable user interfaces in React.js for client-facing websites, translating requirements into production-ready components.
- Implemented backend logic and REST APIs using Node.js, Express.js, and TypeScript to support client applications and internal tools.
- Delivered and maintained end-to-end websites for external clients, covering both frontend development and backend integration.
- Configured and managed AWS EC2 instances and EBS volumes to support application deployment and storage requirements.
- Automated internal workflows and optimized SQL queries, reducing manual effort by approximately 35% and improving data retrieval performance across teams.
- Collaborated with cross-functional stakeholders using Git, GitHub, and Jira, following Agile and test-driven development practices.

Projects

LeetLab.tech — AI-Integrated Coding Platform

React.js | Node.js | Express.js | PostgreSQL | Prisma ORM | Judge0 API | LLM API | Docker

- Engineered a full-stack coding platform, similar to LeetCode, supporting problem-solving, online code compilation, and execution.
- Integrated an in-platform AI assistant that explains coding problems and resolves doubts directly, removing the need to search external sites.
- Designed REST APIs for authentication, coding problems, submissions, and user progress tracking.
- Explored generative AI concepts including temperature tuning and prompt pipeline design while building the AI assistant.
- Containerized Judge0 services with Docker for scalable, isolated code execution.

StudyBuddy AI — Document-Based Learning Assistant

Python | FastAPI | PostgreSQL | LLM API | RAG

- Developed an AI learning assistant that answers questions strictly from an uploaded PDF, keeping responses grounded in the reference material instead of general chat knowledge.
- Added a one-click quiz generator that produces flashcards and practice questions from the uploaded content.
- Implemented a document-scoped chat feature allowing students to ask follow-up questions tied to their own material.
- Designed backend APIs in Python to process and index document content for retrieval-based question answering.

Remix UI — Collaborative Group Project

React.js | Remix | Git | CI/CD

- Contributed frontend features to a shared UI component project as part of a team.
- Set up and applied CI/CD pipeline practices for automated build, test, and deployment workflows.
- Coordinated with team members through Git-based version control and pull request reviews.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, Java, C++

Frontend: React.js, Next.js, Redux, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Microservices (Basics)

Databases: MongoDB, PostgreSQL, MySQL, Prisma ORM

Cloud & DevOps: AWS (EC2, EBS, S3), Docker, CI/CD, Git, GitHub

Core Computer Science: Data Structures, Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

Tools & Practices: Jira, Agile, Test-Driven Development, Postman, VS Code

Education

Vellore Institute of Technology, Bhopal

CGPA: 8.64/10

Bachelor of Technology in Computer Science and Engineering

Relevant Coursework: DBMS, Data Structures, Algorithms, Operating Systems, Computer Networks, OOP, Software Engineering
